TECHNICAL TRANSLATIONS is published in cooperation with the Special Libraries Association Translations Center to list translated technical literature available from the Office of Technical Services, the Library of Congress, the Special Libraries Association, European Translations Center, other cooperating foreign governments, commercial translators, publishers, universities, and other sources.

The Special Libraries Association is responsible for collecting translations from non-Government sources, both domestic and foreign; the Office of Technical Services for collecting translations from both U.S. and foreign government sources since 1940.

The material available from the Office of Technical Services generally has been translated by other agencies of the Government and by private organizations and turned over to OTS for reproduction and distribution. OTS assumes no responsibility for the accuracy of the translations.

OTS provides reference service for the location and identification of translated materials, both completed translations and translations in process.

HOW TO ORDER TRANSLATIONS

The translations reported in this issue are arranged under the categories indicated in the Contents. The sub-groups of the categories are flexible and used only when there are several translations in a particular sub-group. When the subject of a sub-group is not included in the Contents, reference should be made to the general category into which it falls.

References to sources of original text are given as they appear on the translation, with sufficient editing to assure uniformity in citations.

Some of the translation notes for individual translations have been marked with the symbol (#) preceding the name of the journal. This symbol indicates that the particular journal is also translated cover-to-cover.

Listed below are agencies from which translations may be purchased. Each entry in the Technical Translations indicates by symbol the agency from which the translation should be ordered, the cost of the translation (if known), and the number by which the translation may be ordered, if such a number exists. Make check or money order payable to the agency indicated.

Some of the translations available from OTS or SLA are supplied in printed form; others are Xerox reproductions. Prices are listed in each entry. Any reports available from OTS or SLA will be provided in microfilm (35mm) on request. The following prices are charged for microfilm: 1 through 20 pages, 80 cents minimum, and three cents per page for every page in excess of 20 pages. Translations ordered from other sources, unless specific information is given to the contrary in the journal entry, are in printed form.

U.S. DEPARTMENT OF COMMERCE FIELD OFFICES

Working closely with various units in the Department and, when necessary, with other Government agencies, the Field Offices provide business services to manufacturers, wholesalers, retailers, trade publications, trade associations, advertising agencies, research groups, financial institutions, and exporters and importers.

Experienced personnel will gladly assist in the solution of specific problems, explain the scope and meaning of regulations administered by the Department, and provide practical assistance in the broad field of domestic and foreign commerce. Field Offices act as official sales agents of the Superintendent of Documents, and maintain an extensive business reference library containing periodicals, directories, publications and reports from official as well as private sources.
